

MEMORANDUM FOR: Comptroller

SUBJECT : Development of Administrative Plans
for Activated Projects

25X1A 1. Pursuant to the provisions of [REDACTED] as revised 24 November 1952, which provides that projects subject to this Regulation shall only be activated after the development of an administrative plan approved by the DD/P or other operating offices concerned and authorized by the DD/A, you are advised that no advances of funds will be made to a project subject to the Regulation, for which funds have not been provided prior to 24 November 1952, until a properly approved administrative plan has been furnished to the Finance Division, Office of the Comptroller. This prohibition will apply to all such projects even though the project has been approved by the Project Review Committee or a Deputy Director.

25X1A

2. It is recognized that there are many operating projects activated previous to 24 November 1952 for which no administrative plans have been developed or approved; and it is realized that, in view of the substantial number of such projects, it will require some time to develop and secure necessary approvals for administrative plans covering their operations. It is also recognized that a serious disturbance of operations of these projects would follow from any abrupt discontinuance of further financing. Accordingly, in order to obviate such disturbances to operations, the Finance Division is authorized to continue to provide funds for any projects subject to [REDACTED] to which funds have been provided prior to 24 November 1952.

25X1A

3. The Project Administrative Planning Staff has been directed to take necessary action to expedite as rapidly as practical the development of administrative plans for all projects subject to the provisions [REDACTED] and for which such plans have not been provided.
